

Table 5: Regulatory Blind Spot Index (EU AI Act vs. Ecological Risk)
A cross-referencing of ecological risks against EU AI Act safety classifications. Key finding: 'Limited or Low Risk' systems carry a higher average severity score (2.82) than 'High Risk' systems (2.57). Bold row marks the regulatory inversion.

EU AI Act Classification	Total Risks	Avg. Eco Severity Score
Limited or Low Risk	17,319	2.82
High Risk	5,958	2.57
High-Risk Exception	381	2.20
Excluded	282	2.07
Prohibited	2	4.00
